Automated Systems Approach to Training (ASAT)

- **Information management system that AMEDDC&S uses to create Lesson Plans, and Course/POI development**
- **ASAT plans to upload information to the RDL for download / Learning Management accessed through AKO**

POI Status

- **Currently using 1998 version**
- **In 2002 proposed POI**
 - **Transition of ISSs/Training Developer**
 - **ASAT Requirements**
 - **Jan 2003 received go ahead from Ms. Quick**
- **Concerns addressed in 2002 proposed POI**
 - **Skills relating to teeth cleaning has changed**
 - » **Scaling no longer taught**
 - **OJT was reduced from 40 to 5.5 hours**
 - **Field Training is still 8 hours - no generators**

POI Status

- **Staffing of 2005 Version POI - the course has been designed to mirror the active component course 330-91E10 Dental Specialist POI dated Sep 2004.**

Phase 1 - IDT

- **This phase is divided into two modules. Module A is 13 hours of independent study of basic dental science information referenced in MD1357-03. This is to be completed by the soldier on his/her own time prior to resident instruction. Soldiers will be tested on the independent study upon arrival for training. The length of IDT in Module B is 116 hours.**

Phase 1 - IDT

- **This phase provides the prior service Reserve Component soldier with the skills necessary to perform tasks associated with basic life support for healthcare providers, dental materials, infection control, dental radiology, chair, unit and handpiece maintenance.**

Phase 2 - ADT

- **This phase is 121 academic hours and provides the ADT personnel skills necessary to perform dental assistant duties. Subjects include dental administration, dental restorative and specialty instrumentation, general assisting, surgical assisting and familiarization with field dental equipment.**

Course Summary Comparison

		1998		2005	
		<u>ADT</u>	<u>IDT</u>	<u>ADT</u>
